PROFILE

3.5+ years of full stack Java Software Engineering experience and specialized in developing and managing complex projects and gathering requirements, especially in healthcare and EVV (Electronic Visit Validation) systems. Worked in a team of 50+ members and led some core projects, delivering high-quality results. Strong experience in code review, cross-team development, mentoring, ensuring compliance with accessibility, and efficient project delivery using Scrum practices. I aim to build secure, reliable, scalable, and robust systems.

WORK EXPERIENCE

Therap (BD) Ltd.

Software Engineer II

Dhaka, Bangladesh

April 2024 - Present

- Developed and maintained a large-scale SaaS application (therapservices.net) with 20+ state contracts. **The application has 30,000+ active users and serves over 500,000+ individuals.**
- Worked on a team of 50+ individuals and maintained core system functionalities, including Login, EVV, Scheduling (Calendar), and Secure messaging (Internal mailing).
- Architected and developed Webhook for Therap's aggregator application, enabling system-to-system communication with Therap suite efficiently and improved data integration.
- Load tested APIs using Gatling and optimized endpoints, improving performance **by a factor of 10x** to handle over **500+ requests per second.**
- Optimized **DB I/O for a feature by a factor of 25x** by using Oracle Coherence and write-back method.

Software Engineer

March 2022 - April 2024

- Led critical projects such as **Salesforce live chat integration** in Therap System and automated chat import process from a third-party system using RestAPI.
- Architected and redesigned third-party API endpoints, **reducing API calls by 50%**. Developed several RestAPIs for multiple existing modules to support cross-platform development, including mobile platforms and IoT.
- Delivered state-specific solutions for Kentucky and Tennessee, implemented rollout-dashboard, and contributed to meeting the 21st Century Cures Act mandated by the Federal Government, which helped Therap to secure multi-million dollar state contracts.
- Optimized on-demand loading for JavaScript scripts across the system, **reducing network consumption by 20%.**
- Optimized most-frequent cron job DB queries and **improved performance by 5x.**
- Involved in development and QA-side server deployment using Weblogic, Nginx, and Tomcat, ensuring high performance and stability.

Associate Software Engineer

March 2021 - March 2022

- Developed and maintained several state projects with HIPAA compliance and contributed to core modules while maintaining PHI.
- Optimized and fixed bugs for core modules, such as Therap's T-log, which has millions of forms submitted every week.
- Fixed bugs for existing APIs and developed RestAPIs for third-party consumers.
- Developed an in-house message translation tracker for the localization of the application.

Tech stack: Java, Javascript, Spring MVC, Spring Security, Spring Boot, Servlet, Hibernate, JDBC, MySQL, Oracle Sql, JSP, HTML, CSS, REACT, PrimeFaces, Gatling, Postman, Git, Jira, Linux.

SKILLS

Backend: Java, Python, C, C++, C#, Javascript

Frontend: HTML, CSS, Bootstrap, React, Javascript, JSP, PrimeFaces

Competitive Programming: Solved 500+ data structure and algorithmic problems on various online judges

Database: Oracle, MySQL, PostgreSQL

Dev-Ops: Nginx, Weblogic, Docker, TomCat

Project Management: Jira, Trello

Load test: Gatling, Postman

Tools/Frameworks: Shell Scripting, Maven, Gradle, Git, Linux, L^AT_EX, X_RLabel, J_RLabel, JDBC, Hibernate, Spring MVC, Spring Core, Spring Boot, Spring Security, Gatling, Postman, JUnit

Core competencies: Leadership and cross-team collaboration in an Agile development environment, Problem-solving and optimization, Strong communication skills, Adaptability in a fast-forwarding environment, Mentoring, and Knowledge sharing.

EDUCATION

Bangladesh University of Engineering and Technology (BUET)

Masters in CSE - 3.75/4.00

July 2021 – Present

Dhaka, Bangladesh

Mentionable Courses: Network Security, Programming languages and Systems, Advanced Digital Image Processing, Neural networks, Bioinformatics algorithms

Thesis: Handwritten characters recognition and dataset for the Chakma language

Bangladesh University of Engineering and Technology (BUET)

February 2016 – February 2021

Bachelor in CSE - 3.30/4.00

Dhaka, Bangladesh

Mentionable Courses: Data Structures and Algorithms I & II, Operating System, Computer Security, High-Performance Database systems, Artificial Intelligence, Pattern Recognition, Machine Learning

Thesis: Study of Spanning Trees with Maximum Number of Leaves

LANGUAGES

- Bengali (Native)
- English (**TOEFL - 99/120**)

RECOMENDATIONS
